

P.X: NO MAN'S SPACE

P.X Trilogy - Book One | Book Information

Author: Kerim Tapkan

Genre: Science Fiction / First Contact / Space Opera

Language: English

BOOK OVERVIEW

A secret born at the Congress of Vienna in 1815 and lost for two centuries resurfaces in the life of Kai Carson. Fascinated since childhood by space and humanity's place in the universe, Kai is drawn into the center of Earth's first true contact after receiving an inexplicable message.

But what confronts him is more than an unknown civilization. As a mystery rooted in humanity's past, shifting global balances and powers shaped far beyond Earth begin to move at once, Kai realizes that he is becoming part of something far larger than he imagined.

P.X: No Man's Space is a multilayered science-fiction novel bringing together first contact, historical mystery and interstellar politics.

KEY THEMES

- First contact and the encounter with the unknown
- Humanity's place in the cosmos
- Power, politics and trust between civilizations
- Legacies and secrets carried from past to future
- Humanity's struggle between unity and division
